

SITL_Vault_Structure_Guide

SITL Obsidian Vault — Structure & Content Guide

Vault name: sitl_vault
Local path: C:\Users\theli\sitl_vault
GitHub repo: https://github.com/TheLittlestAskew/sitl_vault (private)

This document defines every folder, file, and section in the Sky Is The Limit Obsidian vault. It serves as the authoritative reference for what goes where during Convo 2 vault updates.

Folder-by-Folder Breakdown

00-Campaign-Hub/

The central command center for the entire campaign. Every other vault file links back here. Updated after every session.

Campaign Dashboard.md

The single most important file in the vault. Central hub that links to everything.

Sections:

Sessions Table

Running log of all sessions played.

Column	Content
Session #	Zero-padded (01, 02, etc.)
Date	MM/DD/YYYY
Title	Final chosen session title (must match the session notes file exactly)
Notes Link	[[Session ## - Title]]
Summary	1–2 sentence session summary

NPC Companions

Tracks NPCs currently traveling with or allied to the party.

Column	Content
Name	NPC name, backlinked: [[NPC Name]]
Status	Active / Left / Dead / Missing / Captured
Joined	Session # when they joined the party
Notes	Current role, relationship to party, notable changes

Key Antagonists

Tracks known enemies, threats, and opposing forces.

Column	Content
Name	Antagonist name, backlinked
Affiliation	Faction, group, or independent
Status	Active / Defeated / Unknown / Fled
Last Seen	Session # and location
Notes	Threat level, motives, abilities observed

Locations

Master list of all locations the party has visited or learned about.

Column	Content
Location	Name, backlinked: [[Location Name]]
Region	Parent region if applicable
First Visited	Session #

Column	Content
Status	Explored / Partially Explored / Known But Unvisited / Hostile / Safe
Notes	Key details, who/what is there

Open Threads

Running tracker of unresolved storylines, mysteries, and objectives.

Column	Content
Thread	Description of the open question or objective
Introduced	Session #
Status	Open / In Progress / Completed (Session #) / Abandoned
Related	Backlinks to characters, locations, sessions involved

In-Game Timeline

Tracks elapsed in-story time. Cross-reference with `dnd_elapsed_time_from_transcripts_reliability_ranked`.

Column	Content
Phase	Narrative phase description (e.g., "Prison captivity," "Escape to safe house")
Sessions	Session range (e.g., S03–S04)
In-Game Time	Estimated elapsed time
Notes	Special rules (e.g., "Feydark time is non-linear")

House Rules & Rulings.md

Every DM ruling, homebrew decision, or house rule Addison has made during play. These override the 2024 PHB per Source Authority Hierarchy.

Section structure:

- Organized by topic (combat, spellcasting, resting, exploration, social, etc.)
- Each entry includes: the ruling, session it was made, context/trigger, and any clarifications

Example entry:

```
### Combat – Opportunity Attacks
**Ruling:** [Description of Addison's ruling]
**Session:** [[Session 05 – Silvered]]
**Context:** [What prompted the ruling]
```

Loot Tracker.md

Cumulative record of every item the party has acquired, lost, or interacted with.

Structure: One section per session, in reverse chronological order (newest first).

Section header format: ## Session [##] – [Title] ([MM/DD/YYYY])

Table columns per session:

Column	Content
Item Name	Name of the item or artifact
Acquired By	Who picked it up or received it
Current Holder	Who has it now (may differ from acquired by)
Status	Held / Equipped / Lost / Destroyed / Given Away / Stored
Notes	Properties, abilities, context of acquisition
Session Acquired	Session # (redundant with section header but useful for search)

Quote Board Master.md

Cumulative collection of notable quotes from every session. Verbatim only.

Structure: One section per session, in reverse chronological order (newest first).

Section header format: ## Session [##] – [Title] ([MM/DD/YYYY])

Entry format:

```
**[CHARACTER NAME] · [Tag]**
> "[Verbatim quote]"
```

Valid tags: [Funny], [Poignant], [DM Quip], [Banter], [Serious], [Important to Story]

Rules:

- Quotes must be verbatim from the transcript
- Attribute to the character (in-character speech) or player name + (OOC) for out-of-character
- Preserve order of occurrence within each session

Profanity Ledger.md

Tracks all profanity across the campaign.

Structure: One section per session, plus a running totals section at the top.

Running Totals (top of file):

Column	Content
Speaker	Player/character name
Campaign Total	Running count across all sessions
Most Common	Their most-used curse word

Per-session section header format: ## Session [##] – [Title] ([MM/DD/YYYY])

Per-session table columns:

Column	Content
Speaker	Who said it
Curse Word	The word used
Frequency	Count within this session
Context	Brief description of the moment

01-Sessions/

One markdown file per session containing the full session notes adapted for Obsidian.

Filename format: Session [##] – [Title].md

- Session number zero-padded to 2 digits
- Em dash between number and title
- Title matches the final chosen title exactly

Examples from vault:

- Session 01 – Prisoners of the Underdark.md
- Session 06 – The Long Way Down.md
- Session 09 – Every Party Needs A "Little Guy".md

Content: Full session notes in markdown, matching all 8 sections from the session notes template (Metadata, POV Journal, Session Analysis, Character Activity, Artifacts, Logs, Quotes & Language, Archivist Notes). Adapted from the .docx output to markdown with `[[backlinks]]` to all characters, locations, and items mentioned.

Backlink rules within session files:

- Every character name (PC and NPC) gets a backlink on first mention: `[[Kit Aluri]]`, `[[Ilvara Mizzrym]]`
- Every location gets a backlink on first mention: `[[Velkynvelve]]`
- Every significant item gets a backlink if it has its own page
- Link to other sessions when cross-referencing: `[[Session 05 - Silvered]]`

02-Character_Journal/

Kit Aluri's in-character POV journal entries, collected across all sessions.

Primary file: `Kit Aluri Journal.md` (single file, growing over time with collapsible sections per session)

Section format:

```
## Session [##] - [Title] ([MM/DD/YYYY])

> [!note]- Kit's Journal Entry
> [Full POV journal entry exactly as it appears in the session notes - no modifications]
```

Rules:

- Paste the POV journal entry exactly as generated in Convo 1
- Do not edit, summarize, or modify the text
- All POV Journal Hard Limits still apply (no OOC, no metagaming, no mechanical language)
- Use Obsidian callout syntax for collapsible sections

Housekeeping note: This folder may contain working/temp files from previous update attempts (e.g., `_S09_addition.md`, `_temp_header.md`). These are artifacts of past edits and should be cleaned up when possible — all journal content should live in the single primary file.

03-Characters/

Individual pages for every PC and NPC encountered in the campaign.

03-Characters/PCs/

One file per player character, plus their character sheet PDF snapshots.

Current files:

- `Kit Aluri.md` + `Kit.pdf`
- `Binks Stonevein.md` + `Binks.pdf`
- `Aeolus.md` + `Aeolus.pdf`
- `Blarg.md` + `Blarg CS.pdf`
- `Darby Stonefeather.md` + `Darby.pdf`
- `Amanita de'Champignon.md` (no PDF — sheet missing)

Frontmatter:

```
---
type: pc
race: [Race]
class: [Class/Subclass]
affiliation: [Faction, group, or allegiance]
status: [Alive / Dead / Missing / Captured / Cursed / Unknown]
player: [Player name]
first_appearance: "[[Session 01 - Prisoners of the Underdark]]"
```

location: [Last known location]

Sections (in order — skip if no info yet):

1. **Description / Appearance** — Physical description, notable features, armor/gear appearance
2. **Backstory** — Known backstory elements revealed through play or character details docs
3. **Personality** — Behavioral traits, mannerisms, speech patterns, quirks
4. **Abilities & Class Features** — Class features, spells, wild shape forms, fighting styles used during play. Character sheet PDFs = baseline; transcript = authority for anything during play
5. **Inventory / Loot** — Items currently held or previously held. Note session acquired and current status (Held / Equipped / Lost / Given Away)
6. **Relationships** — Connections to other PCs, NPCs, factions. Note how relationships have evolved by session
7. **Key Events** — Major moments involving this character, organized by session with `[[backlinks]]`
8. **Key Quotes** — Verbatim quotes attributed to this character, with session attribution
9. **Related** — Backlinks to sessions, locations, connected characters

Update rules:

- Only add information directly supported by transcript or source files
- When info updates or contradicts a previous entry, update the existing entry (do not duplicate). Note the session where the change occurred
- Character sheet PDFs = baseline stats; transcript = authority for anything during play

03-Characters/NPCs/

One file per NPC encountered in the campaign.

Current NPCs: Asha Vandree, Buppido, Carbra, Chris, Derendil, Echo, Eldeth, Glabbagool, Ilvara Mizzrym, Jimjar, Jorlan Duskryn, Naos, Psilofyr, Ront, Roxy, Sarith Kzekarit, Shoor Vandree, Shuushar, Stool, Topsy, Turvy

Frontmatter:

```
---
type: npc
race: [Race, if known]
class: [Class/role, if known]
affiliation: [Faction, group, or allegiance]
status: [Alive / Dead / Missing / Captured / Imprisoned / In Hiding / On the Run / Unknown]
first_appearance: "[[Session ## - Title]]"
location: [Last known location]
---
```

Sections: Same structure as PCs (minus `player` in frontmatter), populated only with known information. Many NPCs start sparse and grow over time.

Special rules for DM-voiced NPCs:

- Attribute quotes carefully — only add quotes when the speaker is clearly identified in the transcript
- If Addison's lines could belong to multiple NPCs, flag in the Archivist Notes rather than guessing

Housekeeping note: Patch files (e.g., `Glabbagool_S09_PATCH.md`, `S10_PC_PATCH_NOTES.md`) are working artifacts from previous updates. Their content should be merged into the primary character file and the patch files removed.

04-World-Lore/

Everything about the world: places, regions, and political/social groups.

04-World-Lore/Locations/

One file per specific location (a building, a cave, a room, a landmark).

Current locations: Blingdenstone, Gracklstugh, Mantol-Derith, Menzoberranzan, Neverlight Grove, Nexus Pools Glade, Oozing Temple, The Darklake, The Feydark, The Silken Paths, Upper Cavern, Velkynvelve

Sections:

1. **Description** — Physical description as revealed in play
2. **Notable Features** — Landmarks, hazards, resources, magical properties
3. **Inhabitants** — Who lives/works/guards here. Backlinked
4. **History** — What the party has learned about this place's past
5. **Events** — What happened here, organized by session with backlinks
6. **Connections** — Passages, portals, or routes to other locations. Backlinked
7. **Related** — Backlinks to sessions, characters, factions

Spelling: Use canonical Underdark/Forgotten Realms spellings from `Characters Associated with the Underdark.md` and `Core Forgotten Realms Underdark Regions and Locations.md` in `DND_Sources/`

04-World-Lore/Regions/

Broader geographic areas that contain multiple locations (e.g., the Underdark itself, the Feydark as a region).

Currently empty (`.gitkeep` only). Populate as the campaign expands geographically.

Sections:

1. **Overview** — General description
 2. **Sub-Locations** — List of specific locations within this region, backlinked
 3. **Notable Features** — Climate, hazards, navigation challenges
 4. **Factions Present** — Which groups operate here, backlinked
 5. **Related** — Backlinks
-

04-World-Lore/Factions/

Political, religious, military, or social groups the party has encountered or learned about.

Currently empty (`.gitkeep` only). Populate when faction dynamics become relevant.

Sections:

1. **Overview** — What this faction is and what they want
 2. **Leadership** — Known leaders, backlinked
 3. **Members** — Known members encountered, backlinked
 4. **Territory** — Where they operate, backlinked
 5. **Relationship to Party** — Current standing (Hostile / Neutral / Friendly / Allied / Unknown), how it has evolved by session
 6. **Key Events** — Faction-related events, by session with backlinks
 7. **Related** — Backlinks
-

05-Mechanics/

Game mechanics, class features, and rules references relevant to play.

Current files:

- `Roll_Statistics.md` — Roll trends and stats across sessions
- `Spell_Usage.md` — Spell usage tracking

Additional use cases:

- A class feature used for the first time in play (document how it worked, any DM rulings)
- Multiclass interaction notes
- Homebrew mechanics or modified rules
- Attunement tracking
- Wild shape forms and their stats as used in play

Sections vary by topic but generally include:

1. **Description** — What the mechanic is
2. **How It Played** — How it was used in session, any DM rulings

3. **Source** — PHB 2024 page ref, DM ruling session #, or homebrew
4. **Related** — Backlinks to characters who use it, sessions where it came up

06-Media/

Central storage for all images, maps, screenshots, and media files used throughout the vault.

Current contents: NPC character art, session-specific images, maps (Underdark overlay, Velkynvelve map)

File naming conventions:

- NPC art: descriptive name matching the character(s) depicted (e.g., Buppido Derendil Eldeth.png)
- Session images: [MMddyy] img.png
- Maps: descriptive name (e.g., Underdark_Map_-_Basic_Overlay.jpg , Velkynvelve_map.png)

Obsidian setting: Set Settings > Files & Links > Default location for new attachments to 06-Media so all new attachments are automatically stored here. Any images pasted or dragged into notes will go directly to this folder.

Embedding images in notes:

```
![[Velkynvelve_map.png]]
![[Ilvara.png|300]] ← with width constraint
```

Rule: All images and media should live in 06-Media/ , not at the vault root. Root-level images are considered misplaced and should be moved here.

07-Flora_Fauna/

This campaign is heavily Underdark-themed with significant fungi and creature content. Err on the side of documenting too much.

07-Flora_Fauna/Creatures/

Any creature, beast, monster, or entity that is NOT a playable race in D&D 5E/2024.

Current creatures: Black Pudding, Chasme, Fire Beetle, Giant Spider, Gray Ooze, Myconid, Quaggoth, Vrock

Sections:

1. **Classification** — Type (beast, monstrosity, ooze, aberration, etc.)
2. **Physical Description** — As described in play or source material
3. **Abilities Observed** — What the party has seen it do (attacks, resistances, special traits)
4. **Behavior** — Temperament, tactics, patterns observed
5. **Threat Level** — Estimated danger based on encounters
6. **Encounters** — When and where the party fought or encountered this creature, by session with backlinks
7. **Location** — Where this creature is typically found
8. **Related** — Backlinks

07-Flora_Fauna/Plants_Fungi/

Any plant, fungus, mushroom, moss, or similar organism encountered. **This campaign features heavy fungi/plant content — document generously.**

Current plants/fungi: Feydark Flora, Fire Lichen, Rapport Spores, Timmask, Underdark Bioluminescent Fungi, Zurkhwood

Sections:

1. **Physical Description** — Appearance, size, color, growth patterns
2. **Properties** — Edible / Poisonous / Magical / Medicinal / Bioluminescent / Other
3. **Uses** — How the party or NPCs have used it; known applications
4. **Location Found** — Where this grows, backlinked
5. **Encounters** — Sessions where this appeared, with context
6. **Related** — Backlinks

Session_Sources/

Raw and processed source material for session notes generation.

Session_Sources/Recordings/

Placeholder for session recordings if they ever become available. Currently empty.

Session_Sources/Transcripts/

Contains all transcript-related files organized by processing stage.

Session_Sources/Transcripts/Raw_Unedited/

Original, unedited speech-to-text transcripts exactly as they came out of transcription.

Filename format: [##]-[MMddyy]_raw_transcript.md

Examples: 01-101226_Raw_Transcript.md , 15-050326_raw_transcript.md

Rules: These are READ ONLY source material. Never edit the raw transcripts.

Session_Sources/Transcripts/Corrected/

Corrected, script-formatted transcripts produced during Convo 1 after spell check is confirmed.

Filename format: [##] - [MMddyy]_corrected.md

- Session number zero-padded to 2 digits
- Space-dash-space between session number and date
- Date in MMddyy format

Examples: 01 - 101225_corrected.md , 09 - 020126_corrected.md

Content: The full transcript after spell corrections have been applied, formatted as a script:

```
[Timestamp] SPEAKER NAME: Dialogue or action text.
```

```
[Timestamp] SPEAKER NAME: Dialogue or action text.
```

Speaker label conventions:

- Character names in ALL CAPS for in-character speech: KIT: , BINKS: , ILVARA:
 - Player names + (OOC) for out-of-character speech: TAYLOR (OOC): , MATT (OOC):
 - ADDISON (DM): for DM narration
 - NPC NAME: when Addison is voicing a specific, identified NPC
 - [inaudible/cut off] markers retained as-is
 - Blank line between each speaker entry
 - Original timestamps preserved
-

Session_Sources/Transcripts/Spelling_Corrected_Formatted/

Intermediate stage for transcripts that have had spelling corrections applied but may not yet be in final script format. Currently empty.

Session_Sources/Transcripts/Spell_Check_Logs/

Spell check tables generated during Convo 1 transcript review.

Filename format: [MMddyy]_Spell_Check_Log.md

Content: The structured spell check table:

| Speaker (timestamp) | Transcript spelling | Suggested change | Confidence % | Source |

DND_Sources/

Reference material and DM-provided information. Read-only during Convo 2 (except Notes from Addison.md which may be updated with new DM input).

Current files:

File	Purpose
Notes from Addison.md	Direct DM input — top authority , read before every vault update
Characters Associated with the Underdark.md	NPC name reference for spell checking
Core Forgotten Realms Underdark Regions and Locations.md	Location name reference for spell checking
DND 5e 2024 Players Handbook.pdf	Rules reference (context only, not canon)
SRD_CC_v5.2.1.pdf	System Reference Document
Underdark.pdf	Official Underdark source material (Out of the Abyss)
DnD_SpellLists_1.0.pdf	Spell list reference
dnd_glossary_2022.pdf	D&D terminology glossary
races.pdf	Race reference

Templates/

Obsidian template files used by the Templates core plugin (or Templater community plugin) for creating new vault notes with consistent structure. When creating a new note of a given type, apply the matching template to pre-populate the sections and frontmatter.

Current templates:

- Session Notes Template.md — Scaffolding for new session note files in 01-Sessions/
- NPC Template.md — Scaffolding for new NPC files in 03-Characters/NPCs/
- Location Template.md — Scaffolding for new location files in 04-World-Lore/Locations/

Templates that could be added:

- PC Template
- Creature Template
- Plant/Fungus Template
- Faction Template

Root-Level Files (Vault Housekeeping)

The following files currently exist at the vault root. Most should be moved or cleaned up:

File	Status	Action
README.md	Vault readme	✔ Keep at root
Claude_Project_Instructions.md	Reference copy of project instructions	✔ Keep at root or move to DND_Sources/
moon-linked gemstone flask.md	Stray item note	⚠ Move to appropriate location or integrate into Loot Tracker
Session 01.md	Stray session file	⚠ Likely duplicate of 01-Sessions/Session 01 – Prisoners of the Underdark.md — verify and delete
Untitled.md	Empty/stray file	🗑 Delete
sitl_vault_starter.zip	Original vault scaffold	🗑 Archive or delete
sitl_vault/ (subfolder)	Old/duplicate vault structure with outdated folder numbering	🗑 Delete after confirming nothing unique inside

File	Status	Action
{00-Campaign-Hub,01-Sessions,02-World-Lore (folder)}	Malformed folder from failed batch mkdir	 Delete
Root-level .png files (7 duplicates + 3 unique)	Images that belong in 06-Media/	 Move unique files to 06-Media/ , delete root copies — see Image Cleanup section

Image Cleanup

Already in both root and 06-Media/ (delete from root):

- Buppido Derendil Eldeth.png
- eldeth.png
- Ilvara.png
- jimjar ront sarith.png
- Shushar stool topsy turvy.png
- stool.png
- topsy_and_turvy.png

In root only (move to 06-Media/):

- Ilvara 1.png
- Screenshot 2025-09-28 133542 1.png
- Screenshot 2025-09-28 133542.png

 **Before moving/deleting:** Check if any vault notes embed root-level images with `![[filename]]` . If so, update those links after moving, or set Obsidian's attachment search to all folders (Settings > Files & Links > Attachment folder path > 06-Media , and ensure "Detect all file links" is on).

Backlink Conventions

Backlinks are the connective tissue of the vault. Every note should link to related content.

Content Type	Backlink Format	Example
PC names	[[Character Name]]	[[Kit Aluri]] , [[Binks Stonevein]]
NPC names	[[NPC Name]]	[[Ilvara Mizzrym]] , [[Stool]]
Locations	[[Location Name]]	[[Velkynvelve]] , [[The Feydark]]
Sessions	[[Session ## - Title]]	[[Session 06 - The Long Way Down]]
Factions	[[Faction Name]]	[[House Mizzrym]]
Creatures	[[Creature Name]]	[[Gelatinous Cube]]
Plants/Fungi	[[Plant Name]]	[[Zurkhwood]]

Rules:

- Backlink on first mention within a section (not every single occurrence)
- Campaign Dashboard links to everything — it is the central hub
- Every page includes a ## Related section at the bottom with relevant backlinks

File Naming Conventions Summary

Type	Format	Example
Session Notes	Session [##] - [Title].md	Session 06 - The Long Way Down.md
Raw Transcripts	[##]-[MMddyy]_raw_transcript.md	06-122125_raw_transcript.md
Corrected Transcripts	[##] - [MMddyy]_corrected.md	06 - 122125_corrected.md
Spell Check Logs	[MMddyy]_Spell_Check_Log.md	122125_Spell_Check_Log.md
PCs	[Character Name].md	Kit Aluri.md
NPCs	[NPC Name].md	Ilvara Mizzrym.md
Locations	[Location Name].md	Velkynvelve.md

Type	Format	Example
Regions	[Region Name].md	The Underdark.md
Factions	[Faction Name].md	House Mizzrym.md
Creatures	[Creature Name].md	Gelatinous Cube.md
Plants/Fungi	[Plant or Fungus Name].md	Zurkhwood.md
Media	Descriptive name	Velkynvelve_map.png

Update Cadence

Every file in the vault is updated as part of the **Convo 2 — Post-Session Update Checklist** (19 mandatory items). The checklist ensures nothing is missed. See the master project instructions for the full numbered checklist.

Pre-update requirement: Before writing any vault files, always read:

- 1. All files in DND_Sources/ (especially Notes from Addison.md)
- 2. 00-Campaign-Hub/Campaign Dashboard.md

Post-update: Git plugin auto-commits and pushes to GitHub every 10 minutes. No manual backup step needed.
